Status

This page shows the current status bonuses (or penalties) for all characters in-play. Status is affected by IC actions and events and can be modified by Storytellers as required and Harpies every week. Every Monday players with a Harpy can adjust statuses by a total of 5 dots (+ or -) based on the Harpy's observations. When adjusting status, they should record the change from the previous status in the Change column as `+/- #`, e.g. +2, or -1. They can add reputation notes or rumours that are considered generally known throughout the domain.
